RE: Approval of Final RCRA Facility Assessment (RFA)
McDonnell Douglas Tract I Facility - Hazelwood
EPA ID #: MOD000818963

Dear Ms. Hill:

The Permits Section of the Missouri Department of Natural Resources (MDNR) Hazardous Waste Program (HWP) has reviewed the RCRA Facility Assessment (RFA) submitted by Science Applications International Corporation (SAIC) for the McDonnell Douglas Tract I Facility located in Hazelwood, Missouri.

MDNR received the original RFA document submitted by Metcalf & Eddy, on February 9, 1994, detailing the preliminary assessment (PA) and visual site inspection (VSI) steps of the RFA. Thereafter, the contract for completion of this project, which entailed a sampling visit (SV), was awarded to Science Applications International Corporation (SAIC). During November, 1994, the SV was conducted by SAIC personnel with MDNR oversight. MDNR received the RFA incorporating the PA, VSI, and SV on May 5, 1995. This document was amended with comments and resubmitted by SAIC on August 16, 1995. This latest document has been reviewed by MDNR and appears to adequately address all previous MDNR/EPA comments. In addition, this document has been prepared in accordance with the EPA's RCRA Facility Assessment Guidance document. Consequently, the MDNR hereby approves the August 16, 1995, Final McDonnell Douglas Tract I Facility RFA in accordance with FY95 SEA Grant Work Plan (see enclosed RFA approval form).
